

Quick Facts

Grade Level	6-12
Assessment Type	Computer-adaptive
Structure	Cross-grade
Subject	Math
Test Time	Untimed, breaks encouraged Approx 60-90 minutes per subject
Norm Study	Nationally-normed Updated: February 2020
Administration	Online, at home
Technical Requirements	Internet connection Computer, iPad, or Chromebook Complete requirements: here

What level student should take this test?

MAP Growth Math 6+ is designed for students in 6th through 12th grade.

What is a computer-adaptive test?

This type of test adapts to a student's knowledge level based on their performance as they move through the test. The first question is based on either their registered grade level or their previous MAP performance.

How does a computer-adaptive test work?

The question difficulty adjusts up or down based on whether a student is answering questions correctly or incorrectly.

What Is Assessed
Operations and Algebraic Thinking

- Expressions and Equations
- Use Functions to Model Relationships and Solve Problems

The Real and Complex Number Systems

- Ratios and Proportional Relationships
- Perform Operations
- Extend and Use Properties

Statistics and Probability

- Interpreting Categorical and Quantitative Data
- Using Sampling and Probability to Make Decisions

Geometry

- Geometric Measurement and Relationships
- Congruence, Similarity, Right Triangles, and Trig

How long will it take to receive results?

1-2 days.

What is included in the score report?
Percentile

This compares the student's performance to the norm group showing how the student compares to their grade-age peers in the season that they tested in.

RIT Scores

For Math 6+ *and* for the subtopics.
This is used to track growth over time.

Learning Statements

Learning statements are typically 10-15 pages of specific skills the student is ready to learn.

Quantile® Level

Use to find appropriately challenging materials.
