What level student should take this test?

MAP Growth Reading 2-5 is designed for students in 2nd through 5th grade who are reading independently.

What is a computer-adaptive test?

This type of test adapts to a student's knowledge level based on their performance as they move through the test. The first question is based on either their registered grade level or their previous MAP performance.

How does a computer-adaptive test work?

The question difficulty adjusts up or down based on whether a student is answering questions correctly or incorrectly.

How long will it take to receive results?

1-2 days.
