Definitions

RIT Score

The student's overall score on the test. This is a grade independent measure of item difficulty that ranges from 100-350.

Percentile Rank

The percentage of students in the national norms group for this grade, subject, and test administration season that this student's score equaled or exceeded.

Spring to Spring Growth

An indicator of how much the student's score increased since the previous Fall, compared to other students with similar scores in the same grade and season.

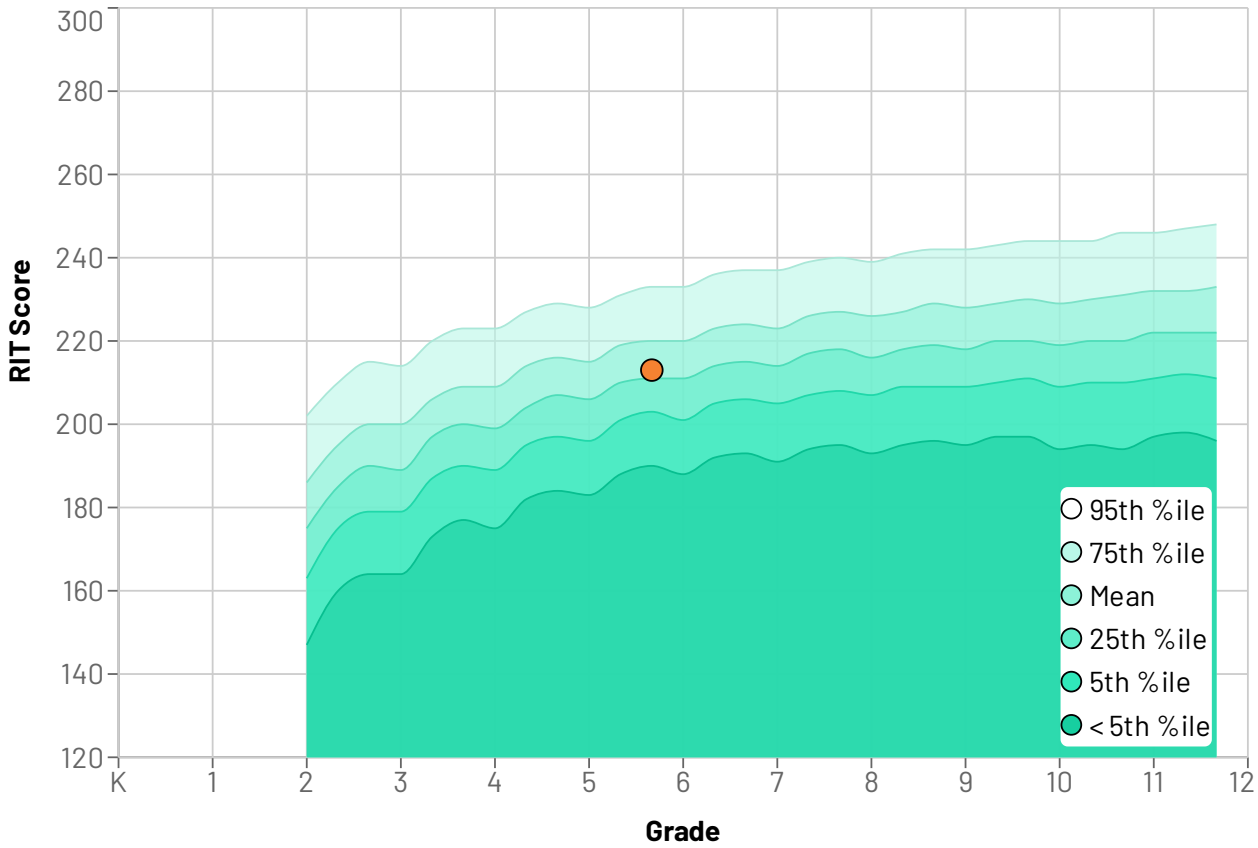

Quantile & Lexile Range

A score (displayed as a 150-point range) resulting from a correlation between NWEA's RIT score and the Quantile or Lexile scale that helps identify reading material that is at an appropriate difficulty level for an individual student.

More information about the Lexile framework may be found: <https://lexile.com>

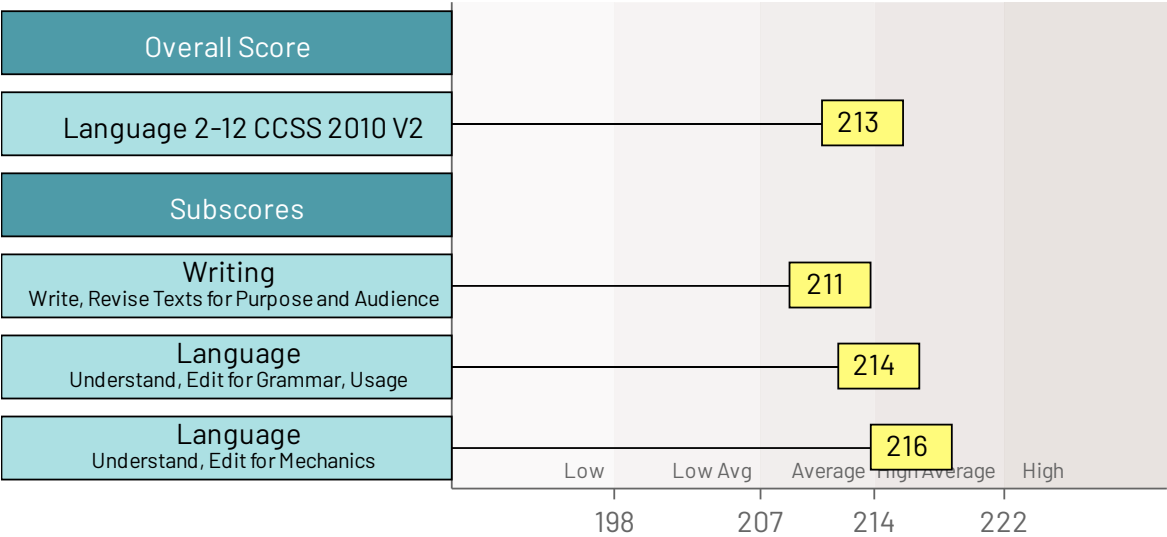

Language Usage

RIT Growth Over Time

George's Language Usage score is **above average** compared to 5th graders in the Spring.

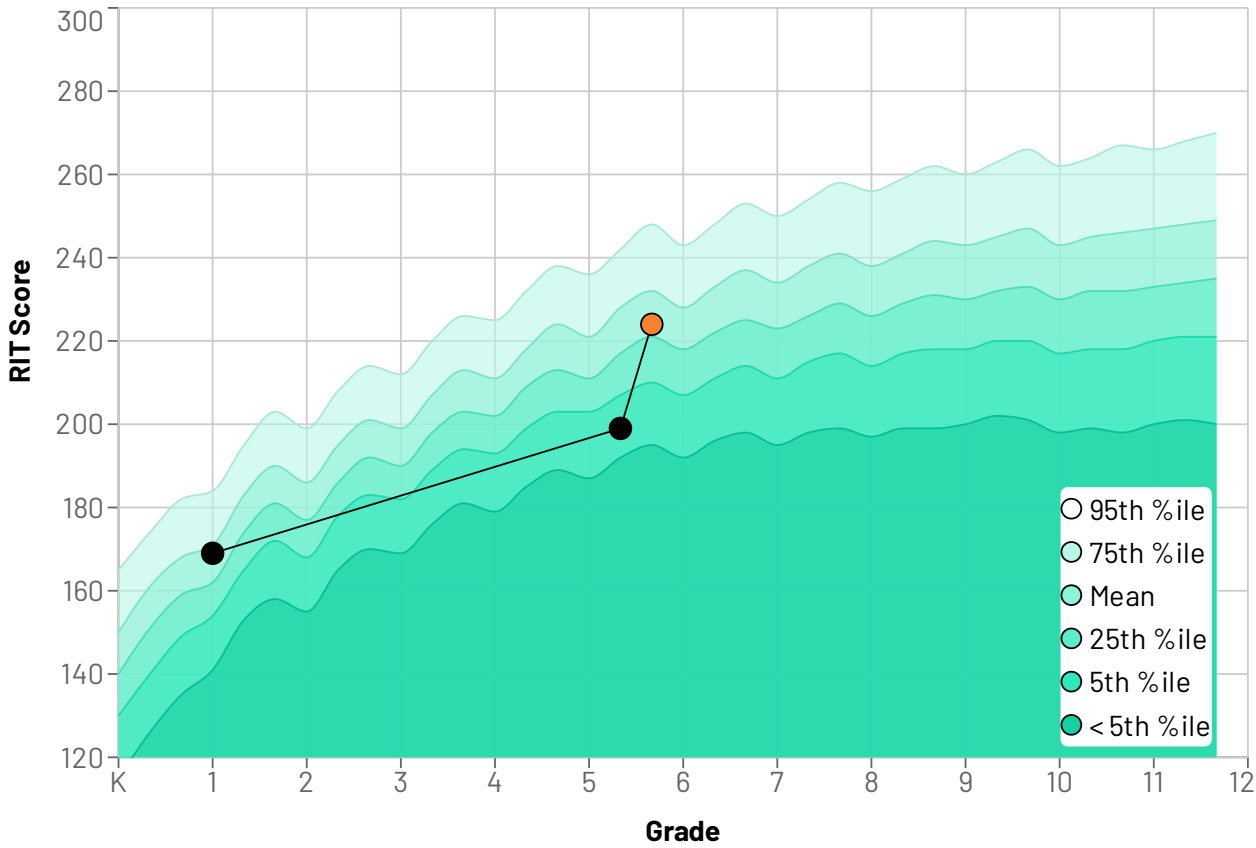

Subscores

Low, Low Avg, Average, High Average & High are based on NWEA's 2020 National Norm Study.
